SUMMARY

I am a passionate **Laravel Web Developer** currently working at **Fablead Developers Technolabs**. My expertise lies in developing scalable web applications using **Laravel** with a strong focus on **RESTful APIs, authentication mechanisms, and third-party integrations**. I have experience working with **MySQL databases**, optimizing queries, and ensuring smooth deployments on production servers.

In addition to my professional experience, I am a **self-taught developer** in basic **React.js, and Laravel Livewire**, continuously expanding my skill set to stay updated with modern web technologies. I have learned and practiced them independently to enhance my development capabilities.

I am proficient in **version control (Git, GitHub)** and have experience deploying applications using **cPanel and Hostinger**. I enjoy solving complex problems, writing clean and maintainable code, and collaborating with teams to deliver high-quality applications.

TECHNICAL SKILLS

Programming Languages	JavaScript, HTML5, CSS3
Frontend Technologies	Laravel Livewire, Bootstrap, Tailwind CSS
Backend Technologies	PHP, Laravel
Databases	MySQL, MongoDB
Version Control	Git, GitHub
API Testing Tools	Postman
Hosting Providers	cPanel, Hostinger

EXPERIENCE

Fablead Developers Technolabs, Surat   March 2024 - Present
-Laravel Web Developer

· fablead Technolab is a service-based company. I am currently working on web application development using Laravel and CodeIgniter, integrated with MySQL database.
· Responsible for analyzing business requirements and translating them into scalable web applications, including development, and deployment on production servers.
· Developed and maintained RESTful APIs to support front-end applications and third-party integrations.
· Worked on authentication and authorization mechanisms, implementing JWT-based authentication for secure access.
· Integrated third-party APIs and payment gateways, ensuring smooth transaction processes within applications.
· Developed reusable components and improved code maintainability following MVC architecture and SOLID principles.
· Conducted code reviews, debugging, and troubleshooting to ensure application stability and security.
· Utilized Git for version control, ensuring seamless collaboration with team members and maintaining a structured codebase.

PROJECTS

Project Management App

· The Project Management App is a task and project-tracking system built with Laravel, designed to streamline collaboration between administrators, managers, staff, and clients.
· Implemented a role-based access system with four roles: Admin, Manager, Staff, and App User, ensuring proper access control.
· Enabled project assignment workflows, where projects are assigned to managers, and tasks are delegated to staff members.
· Integrated task submission and status updates, allowing real-time tracking of project progress.
· Developed a client portal where clients can monitor project progress, review work, provide feedback, and request changes.
· Added resource management functionality, enabling clients to upload necessary files and resources for their projects.
· Included meeting management features for scheduling and tracking discussions related to project tasks.

xPets - Social Media Platform for Pet Owners

· Developed a backend system using Laravel to build RESTful APIs for a pet-focused social media platform.
· Designed and managed MySQL databases to efficiently store user data, posts, reels, and chat messages.
· Integrated APIs to support features like user connections, messaging, and real-time interactions.
· Ensured optimal performance and security by following best practices in backend development.

Ugecy - Campaign and Content Creator Platform

· Ugecy is a platform where campaign creators and content creators collaborate. Based on campaign requirements, content creators submit their work and earn money.
· Contributed to the development of key platform functionalities, including campaign management and content submission processes.
· Worked on implementing user roles and permissions to separate campaign creators and content creators with specific access levels.
· Integrated Stripe payment gateway to process payments to content creators upon successful work submission.
· Enhanced user experience by ensuring smooth workflows for campaign creation, content submission, and payment processing.

E-Commerce Management system

· The E-Commerce Management system is a CRUD application built with Laravel Livewire and Tailwind CSS.
· Integrated Laravel Livewire for real-time dynamic content updates, improving the user experience.
· Used Tailwind CSS for responsive and modern styling, ensuring a clean and user-friendly interface.
· Implemented authentication using Laravel Livewire to manage secure user access.

Localwala - Multi Vendor E-Commerce solution

· Implemented subscription functionality, allowing users to subscribe and access premium functionality.
· Integrated Stripe Payment Gateway for seamless subscription payments and transaction management.
· Worked on other critical features as a service, ensuring smooth user experience and system functionality.
· Collaborated with the team to troubleshoot and optimize the platform, focusing on performance and scalability.

EDUCATION

Angel Multimedia Institute, Surat   **2023**
- Backend Development (1st Class)

Dalia Institute of Diploma Studies, Ahmedabad   **2021**
- Automobile Engineering (CGPA: 9.3)
